SUMMARY

Full-stack developer trained at UC Berkeley Extension Coding Boot Camp, with a certificate in full-stack web development. Dedicated problem-solver with a passion for developing innovative apps, specializing in mobile-first design and development. Known for strengths in creativity, collaborative teamwork, and successfully guiding projects from ideation to execution.

TECHNICAL SKILLS

Softwares/Platforms: React, Express, MySql, MongoDb, REST, GraphQL, API's, WebPack
Software Languages: HTML, CSS, JavaScript, Node.js, JQuery

PROJECTS

BlazeDisplayz

https://the-blazed-render-displayz.onrender.com/ | https://github.com/Gsandman8/BlazeDisplayz

- An e-commerce clothing app featuring products generated by AI. Blending technology with fashion for a one-of-a-kind shopping adventure.
- I contributed to front-end development, designing and adding cart functionality, styling pages, and ensuring a seamless, visually appealing, and responsive user experience.
- HTML, CSS, React, Material UI, Bootstrap, Stripe, MongoDB, Express, GraphQL, Bcrypt, Apollo Server, Vite

Reel & Meal

https://gsandman8.github.io/ReelAndMeal/ | https://github.com/Gsandman8/ReelAndMeal

- Website that helps you find great restaurants by city and discover top-rated movies by genre.
- I designed the app layout and collaborated on integrating Yelp API data, adding a filter for 4-star and above establishments, and creating a user-friendly search history feature.
- HTML, CSS, JavaScript

EzBank

https://ezbank-6a5a197718d2.herokuapp.com | https://github.com/Raymond2811/EzBank

- A user-friendly application that provides seamless and secure banking services
- I handled both ends in collaboration, creating models and controllers for the back end, while also enhancing the layout and adding a translation feature.
- HTML, CSS, JavaScript, Handlebars, Sequelize, Bcrypt, Express, MySQL

JATE

https://editepic.onrender.com/ | https://github.com/Raymond2811/EditEpic

- The application serves as a simple text editor
- The app was partially developed, and my role involved implementing methods to retrieve and store data in an IndexedDB database.
- Express, Webpack, IndexedDB (idb), HTML, JavaScript (JS), CSS, Babel

EXPERIENCE

Assembler   2022-2022

Cutera   Brisbane, CA

I worked with a partner, and together, we took charge of building a variety of hand pieces. Our daily tasks included thorough part checks, planning production quotas, and dealing with any hiccups that came our way.

Customer Service/Cashier   2019-2020

Best Buy   San Bruno, CA

I primarily served as a cashier, but I often assisted customers in finding products or directing them to specialized staff. During closing shifts, I collaborated with my coworker to organize restocking and cleaning responsibilities, ensuring a smooth end to each day.

Customer Service/Cashier   2018-2020

JCPenney   San Bruno, CA

At JCPenney, I held similar responsibilities with a focus on overseeing the home department. In addition to assisting customers, I played a key role in encouraging sign-ups for the JCPenney credit card. During quieter periods, I took initiative in organizing, folding clothes, and restocking shelves to maintain an inviting shopping environment.

Sandwich maker   2016-2016

Esposto's Catering   San Bruno, CA

I worked in a fast-paced environment crafting sandwiches and burritos, stationed in a freezer production line. The process involved assembling each item as it moved down the line, with each team member responsible for adding a specific ingredient. I demonstrated flexibility by being reassigned to different lines when needed to ensure efficient and timely production.

EDUCATION UC Berkeley Extension

Program Certificate: UC Berkeley, Berkeley, CA   Jan 28, 2024

Completed a 6-month intensive program with a focus on acquiring skills in full-stack development.
